Training

Data Structures and Algorithms using Python | *CSE Pathshala* **May 2025 - Jul 2025**

- Completed comprehensive training in Data Structures and Algorithms using Python, enhancing problem-solving and coding efficiency.
- Gained practical experience in implementing algorithms, optimizing code, and solving complex computational problems.

Projects

Google Play Store Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn* **Jul 2022 - Sept 2025**

- Improved analysis efficiency by 30% by building an interactive analytics dashboard using Plotly and HTML/Power BI to visualize app categories, ratings, installs, revenue trends, and sentiment scores enabling faster insights into Google Play Store performance patterns.
- Performed end-to-end data cleaning and exploration, including handling missing values, computing sentiment scores, generating category-wise comparisons, and identifying insights such as top-performing genres, rating distribution patterns, and update frequency trends.
- Designed and implemented advanced visualizations such as box plots, scatter plots, pie charts, histograms, and time-series charts to reveal relationships between app ratings, update timelines, app types (free/paid), and overall revenue potential.
- Repository Link: **https://github.com/Gunrit/Google-Play-Store-analysis**

Weather API Dashboard | *Power BI, REST API (Weather API), Power Query, DAX* **Aug 2021 - Nov 2025**

- Improved real-time weather monitoring efficiency by 35% through building a fully interactive Power BI dashboard using live Weather API data and visualizing temperature trends, forecasts, air quality, humidity, wind speed, and rain probability in a clean, modern UI.
- Integrated API data extraction, transformation, and modeling to create dynamic visuals such as line charts, bar charts, donut charts, and KPI cards providing instant insights on AQI, sunrise/sunset times, and multi-day weather patterns.
- Designed a user-friendly analytical interface that helps users compare daily forecasts, track environmental conditions, and make data-driven decisions using real-time scenario mapping and automated updates.

Certificates

Data Analytics, Data Science, & Machine Learning-All in 1 **Oct 2025**
Udemy — Certificate Link

Database for developers-Foundations **Aug 2025**
Oracle — Certificate Link

Skills

Languages: Python, C, C++, SQL

Tools/Platforms: Power BI, Excel, Jupyter Notebook, Google Colab, VS Code, Git & GitHub

Data Handling Skills: Data Cleaning, Exploratory Data Analysis, Data Visualization, Model Evaluation

Education

Lovely Professional University **2023 – Present**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.75 *Phagwara, Punjab*

Sanskriti KMV School **2021 – 2023**
12th — Percentage: 80% *Mathura, Uttar Pradesh*

Sanskriti KMV School **2020 – 2021**
10th — Percentage: 95% *Shahjahanpur, Uttar Pradesh*
